

Vegreville students to benefit from Redford government's investment in local school

January 30th, 2014

The Redford government will invest in a new modernization project at St. Mary's School as part of its Building Alberta Plan.

"This new project reinforces our commitment to investing in Alberta's families and communities. We are making certain that students and communities, today and long into the future, have the world-class school facilities they need to learn and be successful."

- Alison Redford, Premier

St. Mary's School modernization project will provide major interior upgrades to make better use of space and better meet specialized educational programming needs such as Career and Technology Centers.

"School modernization and renewal is a great example of our government's Building Alberta Plan and its responsible, strategic focus. Making the best use of existing space and investing wisely ensures our Vegreville students benefit from having the most modern, up-to-date facility possible."

- Jacquie Fenske, MLA Fort Saskatchewan-Vegreville

Last spring, Premier Redford committed to build and modernize 120 schools throughout the province. This new modernization project is one example of how the province is building Alberta's school infrastructure. Additional school projects are being announced in the next couple of weeks.

Information about other school [projects](#) currently underway and additional details on the St. Mary's modernization project, as it becomes available, can be found online.

Under the [Building Alberta Plan](#), our government is investing in families and communities, living within our means, and opening new markets for Alberta's resources to ensure we're able to fund the services Albertans told us matter most to them. We will continue to deliver the responsible change Albertans voted for.
